

## **We Are Participating at Energy Efficiency Expo 2010**

Energy Efficiency Expo 2010, a new trade fair showcasing products and services to help organizations reduce their energy consumption and become more energy-efficient, will be held October 19-20, 2010 at the Gaylord Texan Convention Center in Grapevine, Texas near Dallas.

“Energy Efficiency has become a key focus for business, government and institutional organizations,” said David Webster, president of Webcom Communications, the producer of the event. “Attendees will be able to see and learn about the many new products and services available that can help them reduce energy consumption, lower their energy bills and improve their green footprint. Some will even discover new ways they can turn energy-efficiency capabilities into revenue-generation tools for their organization.”

For more information about our company, please visit the conference’s sponsors and exhibitor page, [http://www.energyefficiencyexpo2010.com/EE\\_sponsors.php](http://www.energyefficiencyexpo2010.com/EE_sponsors.php) and click on our logo.

Energy Efficiency Expo is designed to provide solutions for end users in commercial, industrial and institutional markets to help them reduce their energy consumption as well as design engineers, system engineers and integrators to help them develop and provide products and services with greater energy-efficiency attributes.

Key areas of focus for the event are lighting, energy measurement and control, power systems and power electronics, alternative and renewable energy systems, heating and cooling, fuel efficiency, wireless sensing and control, and solutions for efficient management of mobile assets and workforces.

“We expect this to be one of the largest displays of energy efficiency products and services in North America,” said Webster. “Attendees will be able to view a large selection of new solutions from many vendors they have not seen before.”
